ABOUT

I am Partner and Chief Business Officer at Home Inn, and a BBA student at North South University. Home Inn has designed and built architecture, interiors and custom furniture since 2015, 130 projects across 13 districts of Bangladesh. I look after the budgeting, cost tracking and bookkeeping, and I designed the firm's brand identity and its company profile. I also advise Haifa Intelligence, an AI studio, on marketing. Before this I spent two and a half years keeping the books for an online store.

I am interested in how data helps with financial decisions, particularly in lending, budgeting and cost forecasting.

EDUCATION

Bachelor of Business Administration (Hons.)

Summer 2025 — Present

North South University · Dhaka, Bangladesh

EXPERIENCE

Partner & Chief Business Officer

2026 — Present

Home Inn · Dhaka, Bangladesh

Architecture, interiors and custom furniture, built across Bangladesh since 2015 under the trade licence of M/S Ahasan Enterprise. 73 corporate and 57 residential projects in 13 districts.

- Co-own the firm and share decisions on direction, spending and growth with the other partners.
- Keep the budgets, track costs and do the bookkeeping. The partners plan against the summaries I prepare.
- Set the advertising approach across all four lines of work: architectural design, interiors, custom furniture and property.
- Designed the firm's brand identity, from the logo and colour palette through to print-ready visiting cards, and wrote the twenty-page company profile we send to corporate clients.

AI Marketing Advisor

2026 — Present

Haifa Intelligence · Dhaka, Bangladesh

An AI studio that trains its own business-tailored models and hosts them privately for individual and commercial clients.

- Advise on campaign ideas, messaging and audiences for posters and promotional videos made with AI.
- Turn what a client actually needs into clear requirements for their custom model.
- Check the generated work for brand fit and clarity before it goes to the client.

Senior Accountant

Jul 2022 — Jan 2025

Steam Store Bangladesh · Dhaka, Bangladesh

Online store selling digital products.

- Kept the daily books for sales, payments and expenses, and matched incoming payments to orders.
- Watched the daily transactions for anything out of the ordinary and raised it early.
- Prepared regular sales and expense reports in Google Sheets for management.

PROJECTS & ANALYSES

CreditSense AI — Loan Approval Prediction

Banking domain contributor

QUESTION Which model predicts loan approval most reliably, and how should the errors be weighted when a bank is the one acting on them?

METHOD A team project comparing five classifiers, evaluated leak-free and cross-validated. I covered the banking side, explaining how lenders weigh credit history, income and loan amount.

FINDING We judged the models on what their mistakes would cost rather than on accuracy alone. Approving a bad loan costs a lender far more than turning down a good one, so the two mistakes should not carry equal weight.

Python · scikit-learn

LEADERSHIP & ACTIVITIES

Assistant Organizing Secretary

Dec 2021 — Dec 2022

Monipur School and College Science Club · Dhaka, Bangladesh

- Helped plan and run the club's science fairs, from scheduling and logistics to looking after participants.
- Handled executive and administrative work for the club committee.
